

CloudDISPATCH Workflow Management Software

Connect abnormality management into your manufacturing workflows to eliminate flow interruptions and optimize availability.

Without CloudDISPATCH

Powered by CloudDISPATCH

Low visibility to production abnormalities

Real-time view of issues and opportunities

Constraints and priorities are unclear

Focused constraint management

Lack of communication on critical issues

Real-time communication & escalation protocol

Excessive time to resolve problems

Efficiently identify and resolve problems

L2L CloudDISPATCH Facts

Solve Abnormalities with ANDON Workflows

Workflow Management

Configurable workflows tailored to fit plant needs

Intelligent Document Association

Documentation is attached to area, line, and machine workflows

Actionable Data

Simplify large data sets into actionable insights

Automated Andon (Signals)

IoT, MES, and machine-triggered signals

Escalation Protocols

Remain current with all notifications and escalations related to daily operations (production, audits, projects, etc.)

Seamless Integration

Easy to use REST-based web service API

Easy Manual Andon (Signals)

Trigger and escalate issues to be resolved

Dashboards

Full suite of KPI's for visualizing and prioritizing critical gaps

Digital Log Book

Uncover hidden patterns, correlations, & insights

Reports

Analyze real-time data to identify and prioritize performance gaps

Clear Visibility

Understand current business status at a glance, from home or the office

Easy Implementation

No coding required by IT

Automate Response Triggers

Quickly identify, respond to, and resolve issues

Technical Specifications

Mobile ready, cloud-based Lean Execution System (LES) hosted by AWS

Fully-functioning API can be integrated with ERP, MES, EAM/CMMS, MOM, and other

Uninterrupted plant operations with automated feature updates

Seamlessly integrate all existing systems into a unified digital platform

systems such as SAP, JD Edwards, QAD File, M2M, and more

L2L provides a Lean Execution System software platform for manufacturers. It has integrated and easy-to-use lean tools that allow operators and managers to use real-time data to reveal and solve root cause problems that cause metric misses, all while creating a sustainable plant floor culture of continuous improvement.

Trust in L2L

Trusted by Energizer, Goodyear, Schick, Bose and many more

Our software has been driving improvement in manufacturing for over 20 years

24/7 support, free upgrades, and no hidden fees

Finally a win/win for maintenance and production

Schedule a call today to add L2L to your maintenance playbook.
