L2L®

Next Generation CMMS

Transform your maintenance department with real-time, mobile problem solving software.

Without L2L CMMS

Empowered by L2L CMMS

Without L2L CMMS		Empowered by L2L CMMS
Maintenance gets blamed for issues	→	**Maintenance team drives OA improvement**
Lack of historical maintenance records	→	**Aligned production and PM execution**
Excessive downtime	→	**Real time data drives problem solving**
Paper-based maintenance records	→	**Simple, user-friendly interface**
Lack of visibility of spares	→	**Fully integrated spares system**
Disconnected scheduling	→	**Digital scheduling and tracking of resources**

L2L Next-Gen CMMS Software Facts

Real-time Mobile Problem Solving Software for Maintenance

Technician Engagement
Create a culture of problem-solving

Maintenance Supervision
Real-time resource utilization management tools

Intelligent Document Association
Automatically present relevant materials to technicians

Images/Video
Attach visuals to Work Orders to effectively capture machine history and best practices

Budgeting
Cost of asset ownership, total inventory value, and turns

Preventive Maintenance
Digital PM/TPM Checklist with automatic abnormality escalations

Notifications and Escalations
Built-in App-based notifications and escalations for Android and IOS

Predictive Maintenance
Automatically alert Maintenance through Machine(PLC) and IoT integrations

Work Orders
Closed-loop management with drag and drop scheduling functionality

Spare Parts
Real-time BOM development through consumption, easy part search with images

Inventory Management
Automatic reorder triggers based on min stock levels

Calibration Management
Easily schedule and manage calibrated devices and tooling

Operator Engagement
Through daily TPM, operator task tracking and feedback

Reporting
Seamless reporting on all maintenance KPI's (MTBF, Cost, Spares Usage, Downtime, etc.)

Technical Specifications

Mobile ready, cloud-based Lean Execution System (LES) hosted by AWS

Fully-functioning API can be integrated with ERP, MES, EAM/CMMS, MOM, and other systems

Uninterrupted plant operations with automated feature updates

Seamlessly integrate all existing systems into a unified digital platform

Such as SAP, JD Edwards, QAD File, M2M, and more

Trust in L2L

Trusted by Energizer, Goodyear, Schick, Bose and many more

Our software has been driving improvement in manufacturing for over 20 years

24/7 support, free upgrades, and no hidden fees

L2L provides a Lean Execution System software platform for manufacturers. It has integrated and easy-to-use lean tools that allow operators and managers to use real-time data to reveal and solve root cause problems that cause metric misses, all while creating a sustainable plant floor culture of continuous improvement.

Finally a win/win for maintenance and production

Schedule a call today to add L2L to your maintenance playbook.
