L2L

Lean Production Software

Digitize your lean production tools to enhance real-time visibility and problem solving.

Without L2L Production Module

Powered by L2L Production Module

Inconsistent manual data logs	→ **Digital real-time tracking and data**
Antiquated planning/execution tools	→ **Automated production scheduling**
Excessive OT, and changeovers	→ **Automated notifications and escalations**
Staffing difficulties and training gaps	→ **Intelligent e-docs, e-skills and training**
IT manages disparate systems	→ **Minimal IT support required**
No corporate dashboards for KPI's	→ **Real-time KPI roll-up dashboards**

L2L Production Software Facts
Recognize Faster. Respond Faster

Digital Pitch Board
Daily production breakdown and selectable KPI's

Digital Andon Dashboard
Trigger notifications through machine, IoT or manual means

eKanban
Deliver on time with automated production scheduling functionality

Digital Standard Work
Ensure work standards to drive safety, quality, cost, and delivery

Central KPIs & Dashboards
Robust, visualized data from line to boardroom, all in one place

Improve OEE
Focus on solving quality and throughput abnormalities

Operator Portal
Engage employees to drive improvement and productivity

Manager Insights
Managers have real-time information for line and job status

Lean Tools
5S, Kaizen, Yokoten, TPM and Problem-Solving

Skills & Training
Be audit ready by knowing your people are current on training and certifications

Production Reporting
Drill down performance by multi-site, area, line, and machine

Order Demand Planning
Balance demand planning, order execution, and capacity

Reporting
Seamless reporting on all maintenance KPI's (Scrap, rework, downtime, etc.)

Technical Specifications

Mobile ready, cloud-based Lean Execution System (LES) hosted by AWS

Fully-functioning API can be integrated with ERP, MES, EAM/CMMS, MOM, and other systems

Uninterrupted plant operations with automated feature updates

Seamlessly integrate all existing systems into a unified digital platform

such as SAP, JD Edwards, QAD File, M2M, and more

L2L provides a Lean Execution System software platform for manufacturers. It has integrated and easy-to-use lean tools that allow operators and managers to use real-time data to reveal and solve root cause problems that cause metric misses, all while creating a sustainable plant floor culture of continuous improvement.

Trust in L2L

Trusted by Energizer, Goodyear, Schick, Bose and many more

Our software has been driving improvement in manufacturing for over 20 years

24/7 support, free upgrades, and no hidden fees

Finally a win/win for maintenance and production
Schedule a call today to add L2L to your maintenance playbook.
