Manage Complex Projects
Manage large facilities, production line installations, and machine projects

Technical Specifications

Mobile ready, cloud-based Lean Execution System (LES) hosted by AWS

Fully-functioning API can be integrated with ERP, MES, EAM/CMMS, MOM, and other systems

Uninterrupted plant operations with automated feature updates

Seamlessly integrate all existing systems into a unified digital platform

such as SAP, JD Edwards, QAD File, M2M, and more

Trust in L2L

Trusted by Energizer, Goodyear, Schick, Bose and many more

Our software has been driving improvement in manufacturing for over 20 years

24/7 support, free upgrades, and no hidden fees

L2L provides a Lean Execution System software platform for manufacturers. It has integrated and easy-to-use lean tools that allow operators and managers to use real-time data to reveal and solve root cause problems that cause metric misses, all while creating a sustainable plant floor culture of continuous improvement.

Finally a win/win for maintenance and production

Schedule a call today to add L2L to your maintenance playbook.
