L2L

Integrated Skills Management System

Rest easy knowing your team is properly trained and you'll pass every audit.

Without L2L Skills Module

Empowered by L2L Skills Module

Risk audit findings for noncompliance	→	**Audit ready skill record retention**
Training completed late or not at all	→	**Notifications if untrained person enters work cell**
Training related safety & quality issues	→	**Reduced turnover & lost time accidents**
No real-time visibility of training status	→	**Real-time display of associate's training status**
Costs associated with paper based management	→	**A fully digital system (No more paper)**
Labor intensive to manage training	→	**Increased productivity with standardized training**

L2L Skills Software Facts

Manage Worker Training Compliance in Your Daily Operations

Increase Productivity

Ensure workers are trained on latest procedures

e-Signatures

Seamlessly capture qualification documents with electronic signatures

Manage Requirements

Set up training requirements based on job roles/responsibilities

Improve Safety

Automatically trigger notification and escalation of non-compliance

Share best practices from benchmark facilities across your enterprise

Cross-Training Matrix

Real-time access to employee training and certifications

Audit Compliance

Manage safety and quality compliance

Real-Time Notification

Automated reminders of recurring safety and quality training

Technical Specifications

Mobile ready, cloud-based Lean Execution System (LES) hosted by AWS

Fully-functioning API can be integrated with ERP, MES, EAM/CMMS, MOM, and other systems

Uninterrupted plant operations with automated feature updates

Seamlessly integrate all existing systems into a unified digital platform

such as SAP, JD Edwards, QAD File, M2M, and more

Trust in L2L

Trusted by Energizer, Goodyear, Schick, Bose and many more

Our software has been driving improvement in manufacturing for over 20 years

24/7 support, free upgrades, and no hidden fees

L2L provides a Lean Execution System software platform for manufacturers. It has integrated and easy-to-use lean tools that allow operators and managers to use real-time data to reveal and solve root cause problems that cause metric misses, all while creating a sustainable plant floor culture of continuous improvement.

Finally a win/win for maintenance and production

Schedule a call today to add L2L to your maintenance playbook.
